

Ramy Mohamed Sayed

Software Engineer | Backend Developer

📍 New Cairo ✉ mohamedramy228@gmail.com ☎ (+20) 1123381249 🔗 LinkedIn 🐙 GitHub

OBJECTIVE

Backend-focused Software Engineer focused on problem solving and software development. Building APIs and backend systems using modern technologies, with a **Node.js, Express.js, ASP.NET Core, EF Core** and building scalable **REST APIs and cloud-native applications**.

EDUCATION

Bachelor of Engineering

2018 – 2023

Helwan University (HU)

Department: Computer Engineering. Overall Grade: **V. Good**

MILITARY SERVICE

Information Systems Reserve Officer, Egyptian Armed Forces

2024 – 2026

Completed

PROJECTS

Munir

Node.js, Express.js, MongoDB, Flutter

- RESTful backend API and Flutter mobile application for delivering **daily positive unrepeated messages**.
- Rearchitected the system, **Migrated 30k+ users data from in-production Firestore to MongoDB**.
- integrated the Flutter client with the backend and Integrated AI tools to facilitate Application workload and deployed app to **Play Store** .

InTouch

Node.js, Express.js, MongoDB, Socket.IO, React.js, Next.js

- **Multi-tenant** full stack SaaS communication platform using a layered architecture and **WebSocket**.
- Designed a **production-minded layered architecture** with clear Controller → Service → Repository separation, shared contracts, and centralized authorization.
- Built **36 REST API endpoints, 13 custom Socket.IO events, 191+ automated test cases**, shared Zod contracts and 50+ files of **technical documentation** , including ADRs, ERDs, OpenAPI specifications, sequence diagrams, and architecture decisions.

Natours API

Node.js, Express, MongoDB, Pug, Stripe

- **RESTful API** for tour booking and management with MongoDB schemas for 4 collections supporting **authentication**, content management, and user interactions.
- Implemented **centralized exception handling middleware, JWT authentication, refresh tokens**, role-based authorization (RBAC), and **API rate limiting** following **MVC** architecture.

BulkyBook

ASP.NET Core, EF Core, Razor, SQL Server, Azure

- **E-commerce** web application for book store.
- Designed system using **N-tier architecture** for data access and **business logic isolation**.

SKILLS

Backend Development

Node.js, Express.js, REST APIs, MVC Architecture, ASP.NET Core, Entity Framework Core.

Frontend Development

React.js, Next.js, Tailwind CSS, Razor, Pug.

Database

SQL Server, Firebase NoSQL, MongoDB, PostgreSQL.

Cloud & Tools

Git, Android Studio, Postman, Claude Code, GPT Codex, Figma, Atlassian Jira & Confluence, Obsidian, Microsoft Azure, Notion, Docker, Github Actions, Stripe Payments, Jest, Playwright.

Programming Languages

C++, Python, Java, JavaScript, HTML, CSS, TypeScript, C#.

Core Concepts & Architectures

Algorithms, Data Structures, Object-Oriented Programming, SOLID Principles, **Problem solving** , Design Patterns, ACID Databases, Agile methodologies, Authentication & Authorization (JWT, OAuth2, OpenID Connect), Clean Architecture, N-tier Architecture, Layered Architecture, MVC Architecture.
